Installation

You can run BI on python or R. For R users you need to have installed python and the R **reticulate**.

Python

```
pip install BayesInference # For CPU support
pip install BayesInference[gpu] # For GPU support
```

R

```
package.install(BayesianInference)
```

> **i Note**
>
> - As reticulate use it's own python environment, you need to install the python version of BI through reticulate. You can do this by running the following command in R:
>
>   ```
>   reticulate::py_install("BayesianInference", pip = TRUE)
>   ```
>
> - GPU support is only available for linux and WSL2 systems.
